

# R15 - 2 CO, 3 CO

## industrial relays of small dimensions

- Relays of general application • For plug-in sockets: on 35 mm rail mount acc. to EN 60715; on panel mounting; with terminals for soldering
- Coils AC and DC, insulation class F: 155 °C • WT (mechanical indicator + lockable front test button) - standard features of relays in cover, for plug-in sockets. Relays may be provided with the test buttons (no latching) and plugs - page 7 • **Have obtained LR Type Approval Certificate (Lloyd's Register)** • Recognitions, certifications, directives: RoHS, AUCOTEAM GmbH Berlin - railroad standard,       

### Contact data

Number and type of contacts	2 CO, 3 CO	
Contact material	<b>AgNi</b> , AgNi/Au flash gold plating, AgNi/Au hard gold plating	
Rated / max. switching voltage	AC	250 V / 440 V
Min. switching voltage	10 V AgNi, 10 V AgNi/Au flash gold plating 5 V AgNi/Au hard gold plating	
Rated load (capacity)	AC1	10 A / 250 V AC 10 A / 277 V AC UL 508
	AC15	3 A / 120 V 1,5 A / 240 V (B300)
	DC1	10 A / 24 V DC (see Fig. 3)
	DC13	0,22 A / 120 V 0,1 A / 250 V (R300)
Motor load	acc. to UL 508	1/2 HP 240 V AC, 4,9 FLA, single-phase motor 
	AC3 acc. to IEC 60947-4-1	0,37 kW 240 V AC, single-phase motor
Min. switching current	5 mA	
Max. inrush current	20 A	
Rated current	10 A	
Max. breaking capacity	AC1	2 500 VA
Min. breaking capacity	0,3 W AgNi, 0,3 W AgNi/Au flash gold plating	
	0,05 W AgNi/Au hard gold plating	
Contact resistance	≤ 100 mΩ	
Max. operating frequency	• at rated load AC1	1 200 cycles/hour
	• no load	12 000 cycles/hour
<b>Coil data</b>		
Rated voltage	50/60 Hz AC	6, 12, <b>24</b> , 48, 60, 115, 120, 220, <b>230</b> , 240 V
	DC	6, <b>12</b> , <b>24</b> , 48, 60, 110, 120, <b>220</b> V
Must release voltage	AC: ≥ 0,15 U <sub>n</sub>	DC: ≥ 0,1 U <sub>n</sub>
Operating range of supply voltage	see Tables 1, 2	
Rated power consumption	AC	2,8 VA 50 Hz 2,5 VA 60 Hz
	DC	1,5 W
<b>Insulation according to EN 60664-1</b>		
Insulation rated voltage	250 V AC	
Rated surge voltage	2 500 V 1,2 / 50 μs	
Overvoltage category	III	
Insulation pollution degree	3	
Dielectric strength	• between coil and contacts	2 500 V AC type of insulation: basic
	• contact clearance	1 500 V AC type of clearance: micro-disconnection
	• pole - pole	2 000 V AC type of insulation: basic
Contact - coil distance	• clearance	≥ 3 mm
	• creepage	≥ 4,2 mm
<b>General data</b>		
Operating / release time (typical values)	AC: 12 ms / 10 ms	DC: 18 ms / 7 ms
Electrical life	• resistive AC1	≥ 2 x 10 <sup>5</sup> 10 A, 250 V AC
	• cosφ	see Fig. 2
Mechanical life (cycles)	≥ 2 x 10 <sup>7</sup>	
Dimensions (L x W x H)	35 x 35 x 54,4 mm	
Weight	83 g	
Ambient temperature	• storage	-40...+85 °C
	(non-condensation and/or icing) • operating	AC: -40...+55 °C DC: -40...+70 °C
Cover protection category	IP 20 (with socket PZ8, PZ11)	EN 60529
Environmental protection	RTI	EN 61810-7
Shock resistance	10 g	
Vibration resistance	5 g 10...150 Hz	
Solder bath temperature	max. 270 °C	
Soldering time	max. 5 s	

The data in bold type relate to the standard versions of the relays.  For single phase motors for 110-120 V AC do not use motors with higher FLA than given for 240 V AC.

# R15 - 2 CO, 3 CO

industrial relays of small dimensions

**Dimensions - plug-in version (WT), with lockable front test button type T**

**Dimensions - plug-in version, with test button (no latching) or with plug (no manual operation)**

## Mounting, sockets and accessories for relays

Relays **R15 - 2 CO, 3 CO** are designed for mounting in plug-in sockets. **With WT features as standard (W - mechanical indicator + T - lockable front test button)**. In these relays is **possibility self-exchange of button type T for test button R15-M404 (no latching) or on plug R15-M203 (no manual operation)**. The buttons **R15-M404** and the plugs **R15-M203** need to be ordered separately.

5240	240	7 760	$\pm 15\%$	192,0	264,0

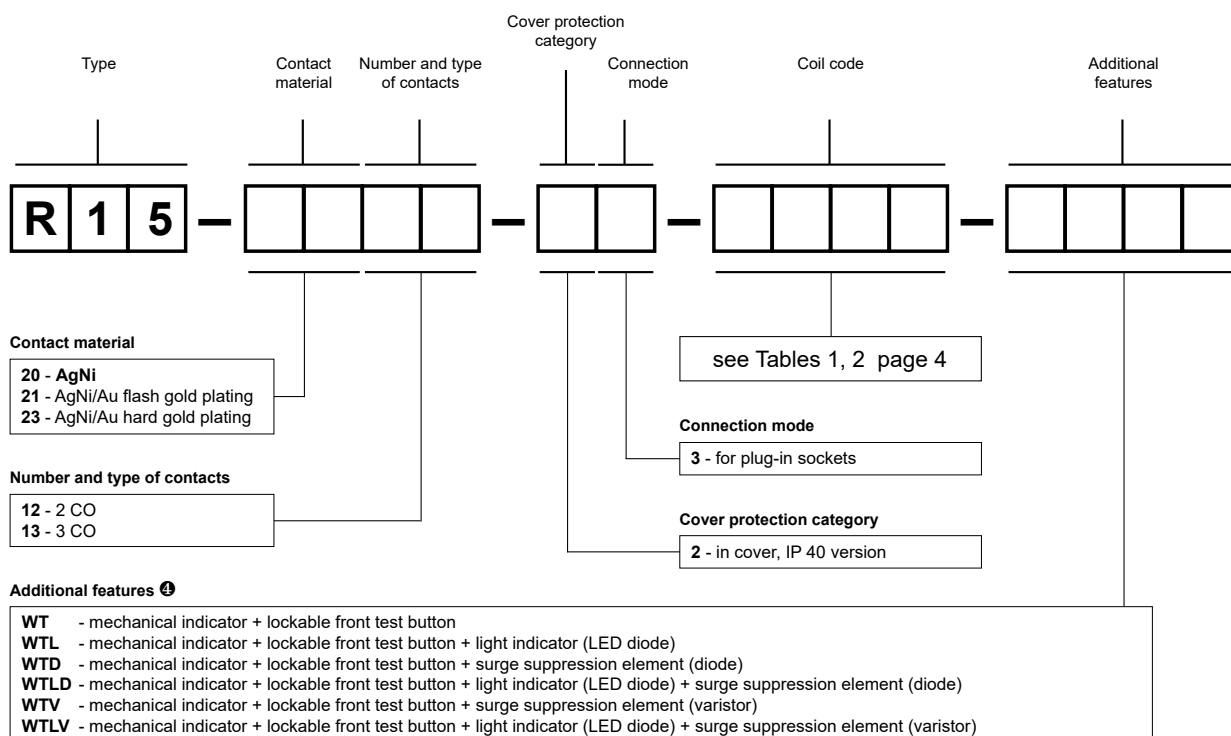

The data in bold type relate to the standard versions of the relays.

# R15 - 2 CO, 3 CO

## industrial relays of small dimensions

### Ordering codes

④ **WT** - standard features of relays for plug-in sockets. **WTD, WTL D** - only for DC coils, **WTV, WTLV** - only for AC coils

**Test buttons (no latching) and plugs** need to be ordered separately. They substitute buttons type T. To be exchanged by the customer themselves.

Information on test buttons (no latching) and plugs - page 7.

- Button R15-M404-A - orange colour (AC coils)
- Button R15-M404-D - green colour (DC coils)
- Plug R15-M203-A - orange colour (AC coils)
- Plug R15-M203-D - green colour (DC coils)

### Note:

While the relay operates, the test button of the **T** type becomes heated. In order to push the test button manually, you should first turn the supply voltage off, and wait some time until the button becomes colder (or push the button immediately using a protective glove or an insulated tool). The button shall be pushed smoothly and quickly. The normally open contacts are closed with the button for the time during which the button is pushed. Releasing the button opens the normally open contacts. Normally open contacts may be closed with the blocking function of the button (it shall be turned by 90°). When the button is turned back, the normally open contacts are opened.

For relays with additional features **D** - surge suppression element (diode) (versions **WTD** and **WTL D**) - fixed supply polarity compulsory for the DC load of coils: +A1(2) / -A2(7) for R15 - 2 CO and +A1(2) / -A2(10) for R15 - 3 CO. The polarity is indicated on the relay cover. For other versions of the relays with DC coils any polarity is possible.

Examples of ordering codes:

#### R15-2012-23-1024-WT

relay **R15**, for plug-in sockets, two changeover contacts, contact material AgNi, coil voltage 24 V DC, with mechanical indicator and lockable front test button, in cover IP 40

#### R15-2013-23-5230-WTL

relay **R15**, for plug-in sockets, three changeover contacts, contact material AgNi, coil voltage 230 V AC 50/60 Hz, with mechanical indicator and lockable front test button and light indicator (LED diode), in cover IP 40

## Additional features for industrial relays

Industrial relays for plug-in sockets: R2N, R3N, R4N, R15 - 2 CO , R15 - 3 CO  with **WT features as standard** (**W** - mechanical indicator + **T** - lockable front test button). **Detailed information** on additional features of individual relays can be found in the data sheets on the side of "Ordering codes".

### Note:

While the relay operates, the test button of the **T** type becomes heated. In order to push the test button manually, you should first turn the supply voltage off, and wait some time until the button becomes colder (or push the button immediately using a protective glove or an insulated tool). The button shall be pushed smoothly and quickly. The normally open contacts are closed with the button for the time during which the button is pushed. Releasing the button opens the normally open contacts. Normally open contacts may be closed with the blocking function of the button (it shall be turned by 90°). When the button is turned back, the normally open contacts are opened.

Type 	Description	For industrial relays
<b>W</b>	mechanical indicator	R2N, R3N, R4N, (R15 - 2 CO, 3 CO  )
<b>T</b>	lockable front test button, orange colour - AC coils, green colour - DC coils	R2N, R3N, R4N, (R15 - 2 CO, 3 CO  )
<b>L</b>	light indicator (LED diode), located inside the relay	R2N, R3N, R4N, RY2, (R15 - 2 CO, 3 CO, 4 CO  ) RUC, RUC-M
<b>D</b>	surge suppression element (diode) - only for DC coils	R2N, R3N, R4N, RY2, (R15 - 2 CO, 3 CO, 4 CO  )
<b>V</b>	surge suppression element (varistor) - only for AC coils	(R15 - 2 CO, 3 CO  )
<b>K</b>	test button without block function	(R15 - 4 CO  ) RUC

### Available combinations:

**WT, WTL, WTD, WTL D** - in relays R2N, R3N, R4N for plug-in sockets

**L, D, LD** - in relays RY2 for plug-in sockets

**WT, WTL, WTD, WTL D, WTV, WTL V** - in relays R15 - 2 CO, 3 CO for plug-in sockets

**K, L, D, KL, KD, LD, KLD** - in relays R15 - 4 CO for plug-in sockets

**K, L, KL** - in relays RUC

**L** - in relays RUC-M

 Voltage versions, in covers

## Test buttons (no latching) and plugs

**Test buttons (no latching)** are recommended for R2N...WT, R3N...WT, R4N...WT, R15...WT 2 CO, R15...WT 3 CO relays - **for applications that do not allow permanent contact latching**. By manual operation (pressing the button) relay contacts can get switched for as long time as long the button is pressed. Contacts return to initial position as soon as pressure is released from the button. Those operations can be done while the coil is deenergized Ⓢ.

Button **R4P-0001** or **R15-M404** can be easily inserted by the Customer after removal of button type **T** (see Fig. 2). Button type **T** can be removed with screwdriver as shown on Fig. 1.

Ⓢ While the relay operates, the test button becomes heated. In order to push the test button manually, you should first turn the supply voltage off, and wait some time until the button becomes colder (or push the button immediately using a protective glove or an insulated tool). The button shall be pushed smoothly and quickly.

### Dimensions - test button R4P-0001 for R2N...WT, R3N...WT, R4N...WT

### Dimensions - test button R15-M404 for R15...WT 2 CO, R15...WT 3 CO

**Plugs R4W-0003** or **R15-M203** can substitute button type **T** if **manual operation (latching and testing) is not allowed**. Changing button type **T** for plug can be done by Customer themselves in the same way as changing button type **T** for button (no latching).

### Dimensions - plug R4W-0003 for R2N...WT, R3N...WT, R4N...WT

### Dimensions - plug R15-M203 for R15...WT 2 CO, R15...WT 3 CO

### PRECAUTIONS:

1. Ensure that the parameters of the product described in its specification provide a safety margin for the appropriate operation of the device or system and never use the product in circumstances which exceed the parameters of the product. 2. Never touch any live parts of the device. 3. Ensure that the product has been connected correctly. An incorrect connection may cause malfunction, excessive heating or risk of fire. 4. In case of any risk of any serious material loss or death or injuries of humans or animals, the devices or systems shall be designed so to equip them with double safety system to guarantee their reliable operation.
