Regulated Converters

RYK

1 Watt
SIP7
Single Output

Description

The RYK DC/DC converters are typically used in cost sensitive general purpose power isolation and voltage matching applications. Despite their low cost, they are fully specified converters with a built-in linear regulator to give a regulated, load-independent output. The converters are equipped with 4kVdc isolation, industrial operating temperature range of -40°C to +105°C without derating, and UL/EN certifications.

Selection Guide
